

Palmer Lovett

I thrive in novel situations and will solve problems few have encountered before. I am detailed and observant with have the ability to make key decisions and weigh outcomes with no regrets—only solutions.

Personally and professionally I strive to be my best self. I am ambitious to learn and grow so that I may become a leader in my work and community. It is important to me that my work challenges and sharpens me. I am interested in people to communicate ideas, execute plans, and make connections for the future. I believe little is accomplished without people, that the sum of our ideas lead to the solution, and that a lack of communication is the greatest barrier to success.

Experience and Skills

Professional

*software implementation
installations and troubleshooting
cloud software configuration
web development (html, php, python)
teamwork and project management
live-stream production*

Personal

*software development / cloud computing
